All-in-One Solutions – MegaBall® / MegaBall® 2 with Adjustable Wall Mount or Recessed and Surface Mount Dome

Stylish MegaBall® multi-megapixel cameras provide ample resolution to zoom-in for details in live or recorded video. These indoor all-in-one solutions integrate a 1.3, 1080p, 3 or 5-megapixel camera with fast frame rates and a choice of a 3.3–10mm vari-focal manual lens or a remote focus/zoom P-iris lens with an adjustable wall mount or flush and surface mount dome housing. An optional ImmerVision Enables® panomorph system offers 180° and 360° views. H.264 compression reduces network bandwidth and storage requirements while delivering full frame rates and full resolution without sacrificing image quality. Day/Night functionality allows for 24-hour surveillance. Wide Dynamic Range (WDR) up to 100dB at full resolution balances light and dark areas in the same scene (1080p and 3MP). Binning mode for increased low light sensitivity is available for 3MP and 5MP cameras.

Image from a 5MP MegaBall® camera

Features Included:

- Remote Focus/Zoom P-Iris Lens (PM Models)
- P-Iris Control to Get Best Depth of Field and Image Clarity (PM Models)
- Optional True WDR up to 100dB at Full Resolution Available on Some 1080p and 3MP Models: See Clearly in Shaded and Bright Light Conditions Simultaneously
- Integrated ImmerVision Enables® Panomorph Solution for 180° and 360° Field of View (DN-01 Models)
- Light Gray and Black Dome Options
- Casino Mode™ Maintains Continuous 30fps Frame Rate Required by Gaming Industry Regulations (AV2145 and AV2245 Models)
- Binning Mode for Strong Low Light Performance on 3MP and 5MP Resolutions
- True Day/Night Functionality with Mechanical IR Cut Filter (DN Models)
- Tamper-Resistant Housing
- Installer Friendly Cable Management, 3-Axis Adjustment, In-Ceiling and Surface Mount Dome
- PoE and Auxiliary Power: 12–48V DC/24V AC
- Dual Encoder H.264/MJPEG
- Privacy Mask, Motion Detection, Flexible Cropping, Bit Rate Control, Multi-Streaming and Forensic Zooming
- Fast Frame Rates
- PSIA Conformant

Integrated Motorized Lens with Remote Focus/Zoom (PM Models)

P-Iris Control for Best Depth of Field and Image Clarity (PM Models)

Panomorph Lens (-01 Models)

All-in-One Ball Solution

Integrated Microphone (-A Models)

True Day/Night with IR Cut Filter

Pixel Binning Mode on 3 and 5MP Models

Wide Dynamic Range Available on Some 1080p and 3MP Models

Casino Mode™ Maintains at Least 30fps on AV2145 and AV2245 Models

Dual Encoder H.264/MJPEG

Wide Field of View

Telephoto Field of View

Forensic Zooming

Arecont Vision MegaBall® megapixel cameras deliver outstanding resolution to capture significant detail whether viewing live or recorded/archived video. With the ability to digitally Pan-Tilt-Zoom (PTZ) images, you can view the details you need to see at any time, such as license plates, faces and other objects of interest. The superior resolution of MegaBall® megapixel cameras along with their varying fields of view allows them to do the work of multiple conventional cameras and provide critical forensic information—all without the need and associated expense of system operators having to “catch” activities of interest as they occur.

Panomorph Lens Option

MegaBall® 2 offers an optional close proximity panoramic view through the use of an ImmerVision Enables® panoromorph lens and software system. Available with a 5MP sensor, the elliptical panoromorph image is dewarped to provide 180° or 360° views with impressive resolution. In comparison, images from fisheye lenses lose more resolution when dewarped. MegaBall® 2 with the panoromorph system is an alternative to Arecont Vision SurroundVideo® 180° and 360° models when the camera will be mounted close to the subject.

Original Fisheye Panomorph Image

Dewarped Panomorph Image

MegaDynamic® Wide Dynamic Range (WDR)

Megapixel image without WDR

Megapixel image with WDR

Users can achieve clear images in extreme lighting conditions with MegaBall® WDR cameras in resolutions of 1080p and 3MP. Wide Dynamic Range up to 100dB at full resolution balances light and dark areas in the same scene, such as in the lobby of an office building with large windows, the loading dock at a distribution facility or many retail environments.

Wall Mount

Ease of Installation

MegaBall®'s unique bracket design encloses all cables, providing better protection from tampering and a more professional installation. The P-iris, remote focus/zoom lens of MegaBall® 2 allows installers to remotely configure the camera.

2MP with live video in MJPEG

2MP with live video in H.264

Compliant H.264 Compression

MegaBall®'s compliant implementation of H.264 allows full frame rates and full resolution without sacrificing image quality. With bit rate control, the CPU load is decreased at both the client (decompression) side and the server/storage side, allowing lower bandwidth and storage relative to MJPEG. Real Time Streaming Protocol (RTSP) allows for compatibility with media players such as Apple QuickTime®, VLC and others.

Flush Mount with Audio

Audio Out with Integrated Microphone

An integrated microphone on some MegaBall® models eliminates the need to install separate audio connectors on site and may be disabled.

MegaBall® / MegaBall® 2 Megapixel IP Cameras

User-Friendly Web Interface: Focus, Zoom, P-Iris Control

For easy installation, remote focus and remote zoom can be done through the camera webpage (MegaBall® 2). Just click “short range focus” or “full range focus” to get a clear image through the dome bubble. The added P-iris functionality provides better depth of field in varying lighting conditions.

Additional Benefits Include:

- Fine tuning for a better image after installation
- Quicker installation for lower total cost of ownership (TCO)
- P-iris is designed to provide the maximum depth of field in any lighting condition to ensure the best possible image quality

Enhanced Low Light Performance

Day Mode

Night Mode

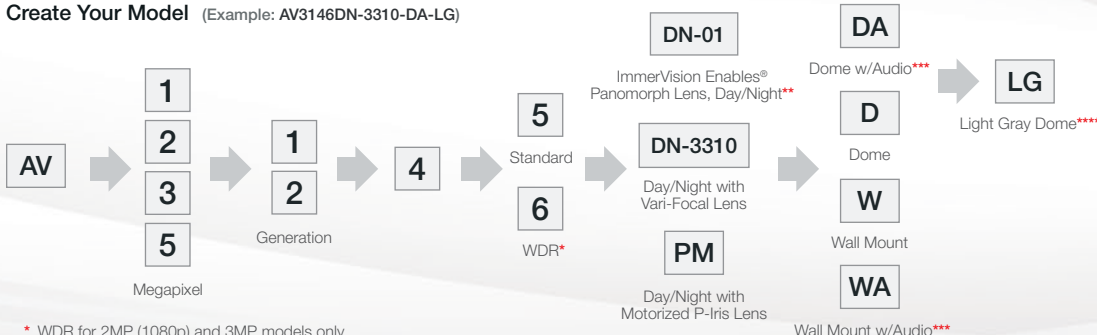

As part of their superior Day/Night operation, MegaBall® cameras include low light enhancing technology such as pixel binning and adaptive noise-cancellation.
